

PTI Series

Premier Intelligent Industrial Transmitters

Features

- Built with the same advanced technology as our existing line of intelligent transmitters that address the sanitary market
- 4 mA to 20 mA HART® protocol available on all models
- All Stainless Steel construction
- Easy programming via onboard display
- Multiple electrical & process connection options
- Active temperature compensation
- 360° rotatable display
- High turndown ratios allow more flexibility in ranges

Applications

- General industrial
- Pulp & paper
- Water & wastewater
- Power generation
- Food & beverage

PTI20 Series Intelligent

first tier | general purpose applications

- For applications where temperature compensated accuracy is important
- **Accuracy $\pm 0.2\%$** of adjusted span
- **6 adjustable** pressure ranges
- **4:1** turn down ratio

PTI30 Series High Accuracy Intelligent

high accuracy | improved rangeability

- For applications where improved accuracy and temperature compensation are required
- **Accuracy $\pm 0.1\%$** of adjusted span
- **5 adjustable** pressure ranges
- **10:1** turn down ratio

PTI40 Series Premier Accuracy Intelligent

highest accuracy | temperature compensation

- Designed for applications where accuracy and temperature compensation are critical
- **Accuracy $\pm 0.075\%$** of adjusted span
- **4 adjustable** pressure ranges
- **100:1** turn down ratio

3 Year Warranty
